

INNOVATING BEAUTY

LISTEN TO THE EXPERTS

HARMONY[®]XL

The **Harmony[®]XL** from Alma Lasers is the world's most comprehensive and expandable platform for aesthetic laser and light treatments, featuring up to 11 different technologies for 60+ aesthetic/medical applications. Here's what a few of your distinguished colleagues had to say about their experiences with the Harmony^{XL} system.

“The Harmony^{XL} has been an invaluable addition to my practice. Its multiplatform technology allows me to treat a wide array of skin and body issues in my medical spa. My practice consists of approximately 80% aesthetics and the Harmony^{XL} was more than worth the investment!”

Irv Wiesman, MD

Board Certified Plastic Surgeon, Chicago, IL

“The Harmony^{XL} system has given me the ability to provide safe, effective care to patients with multiple needs from a single platform. The combination of fractionated erbium laser (Pixel) and Advanced Fluence Technology (AFT) has, in particular, been beneficial to my patients.”

Sam Most, MD

Board Certified Facial Plastic Surgeon, Stanford, CA

“I love the Harmony^{XL} and the versatility it can provide. It can be used on all skin types with excellent results. It is very well tolerated and allows you to offer various services with only one laser! It is well priced and works very well. I have had it for several years and use it daily with no complications with the system, contrary to other lasers I have worked with in the past.”

Seema Patel, MD, MPH

Board Certified in Family Medicine, Admore, PA

“Alma Lasers has provided endless combination treatments in my practice. The versatility of the product has allowed for all skin types to enjoy the benefits of laser and light rejuvenation. Alma offers cutting edge technology as well as extensive marketing support which has helped promote my practice in a very competitive environment in Miami. Alma is a solid company to have a business partnership with.”

Janice Lima-Maribona, DO

Board Certified Dermatologist, Miami, FL
